Summary

Software Engineer with 3+ years of experience building AI-powered, cloud-native distributed systems. Specialized in real-time data processing, ML-driven decision systems, and scalable backend architectures using Java, Python, and AWS. Proven track record of improving system performance, reducing latency, and delivering production-grade intelligent systems.

Technical Skills

Languages: Java | Python | TypeScript | JavaScript

Backend: Spring Boot | Node.js | FastAPI | Flask

Frontend: React.js | Next.js

AI/ML: Scikit-learn | PyTorch | LLM APIs (OpenAI) | Embeddings | RAG

Data & Streaming: Kafka | Redis | PostgreSQL | MongoDB

Cloud & DevOps: AWS (EKS, EC2, S3, RDS, IAM) | Docker | Kubernetes | Jenkins

APIs: REST, GraphQL | WebSockets

Security: OAuth2 | JWT | RBAC

Education

The University of Texas at Arlington

Master of Science, Computer Science

August 2021 – May 2023

University of Mumbai

Bachelor of Engineering, Information Technology

August 2017 – June 2021

Work Experience

Galaxy Software Solutions, TX, USA

Software Developer

October 2023 – Present

- Built an AI-powered document intelligence platform to process and classify 10K+ financial documents/month, reducing manual effort by 60%.
- Designed and deployed backend microservices (Node.js / Spring Boot) handling 50K+ API requests/month for budgeting, payments, and AP workflows.
- Developed a multi-entity budgeting engine with weekly/monthly forecasting, improving financial planning accuracy by 25%.
- Engineered real-time financial dashboards (React + APIs) tracking burn rate, cash flow, and OPEX/CAPEX, enabling 30% faster decision-making.

Seminaut, TX, USA

Web Developer Intern

February 2023 – May 2023

- Engineered scalable backend APIs handling 50K+ requests/month, improving onboarding efficiency by 35%.
- Optimized full-stack workflows (React + Python), reducing user interaction latency by 40% across core features.
- Strengthened authentication and CI/CD pipelines, decreasing deployment failures by 30% and improving release frequency by 2x.

Primary Key Technologies, Mumbai, India

Frontend Developer Intern

September 2020 – July 2021

- Developed reusable React.js components and integrated REST APIs for ERP dashboards, improving UI performance and reducing load time by 30% while supporting 5+ cross-browser environments.
- Contributed to ERP module development and developer enablement, accelerating feature delivery by 25% and successfully delivering 3+ modules within project timelines.

Projects

Community-based Matrimonial Application

- Built a full-stack matrimony platform (React.js, Node.js, PostgreSQL) supporting end-to-end user flows (auth, profile creation, matchmaking, chat), onboarding 1000+ users within the initial launch phase.
- Designed and implemented an AI-driven matching and recommendation system based on user preferences, location, and profile attributes, improving match relevance and user engagement by 30%.

Certifications

AWS Certified AI Practitioner

AWS Certified Cloud Practitioner

November 2025

December 2023
